

# Wireless Sounder & Visual Indicator

## ✓ Key Features

EN54-25 approved

868 - 870 MHz operating frequency

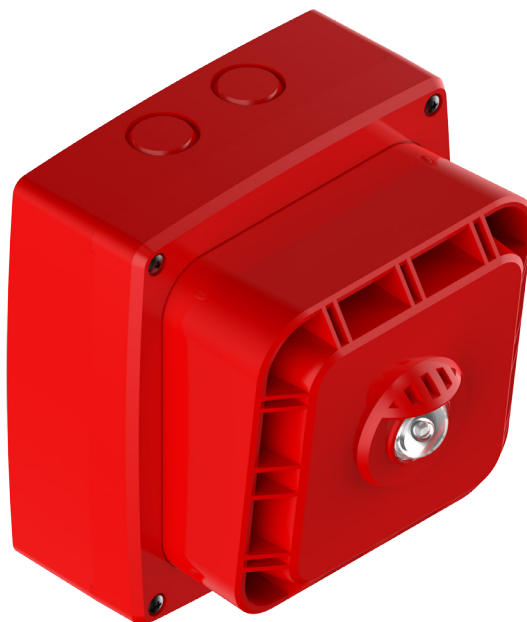

Powered by lithium metal batteries

22 Tone patterns (user selectable)

Available in red or white

## i Overview

The Wi-Fyre Wireless Sounder & Visual Indicator has been designed to give an alarm tone together with a visual (flashing LED) indication when activated. It can be wall or ceiling mounting and is available in either red or white finishes. 22 user selectable tones to choose from, in addition to a volume control.

## ★ Approvals

All Wi-Fyre Devices are fully certified to EN54-25 - the European product standard for wireless fire alarms, which necessitates third party assessment to confirm that it meets very specific requirements.

Wi-Fyre also complies with ENTSI 300:200 - the standard requirements for the Radio Equipment Directive (RED), and BS 5839-1 - the code of practise for design, installation, commissioning and maintenance of fire alarm systems in non-domestic premises.

## Tech Specs

### Radio

 Operating Frequency	868 - 870 MHz, 14dBm
 Range	150m open area

### Sound

 Sounder Type	A
 Sound Output @ 1m	102dB (this applies to 'TONE 0' 800Hz and 970Hz, 500ms each)
 Tone Patterns	22

### Visual Indication

 Visual Indication Type	Light-emitting diode
 Visual Indication Colour	White

### Electrical

 Power Source

4 x Lithium AA Cell (Saft LS14500)

2 x Lithium C Cell (Saft LS26500)

 Battery Life

Up to 3 years

### Environmental

 Operating Temperature	-10 to +55°C
 Humidity	10 to 93% RH (non-condensing)
 Ingress Protection	IP21
 Design Environment	Indoor use only

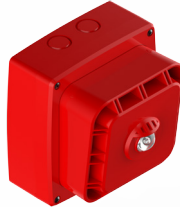

## Tech Specs

### Mechanical

 Housing Material      ABS

 Colour

Red

White

### Size & Weight

 Size

 Weight      0.64kg (141.10 lbs)

## Ordering Information

Part Code	Description
10-032	Wireless Sounder & Visual Indicator with Batteries, Red
10-033	Wireless Sounder & Visual Indicator with Batteries, White
10-081	Wireless Sounder & I/O Lithium Metal Battery Pack
